

PRATEEK TIWARI

Lead Software Engineer

Driving Scalable Engineering Solutions through Microservices, Cloud, and Full-Stack Development

PROFILE SUMMARY

- Accomplished software engineer with 9+ years of experience in full-stack Java development, delivering robust applications across Banking, Healthcare, EV mobility, and IoT domains.
- Expertise in microservices architecture and cloud-native solutions, transforming monolithic systems into scalable, modular, and high-performance applications, with hands-on experience in AWS, Docker, Kubernetes, and CI/CD pipelines.
- Proficient in system design and backend development, crafting High-Level Designs (HLD), Low-Level Designs (LLD), REST APIs, and enterprise-scale distributed systems including event-driven architectures and Kafka-based solutions.
- Experienced team leader and mentor, guiding teams of up to 14 engineers, ensuring efficient task distribution, technical guidance, and timely delivery of high-quality software solutions.
- Skilled in designing scalable and resilient software architectures, including modular componentization, service orchestration, and performance optimization, ensuring high availability, maintainability, and alignment with enterprise standards.

CORE COMPETENCIES

- Full-Stack Java Development
 - Microservices Architecture
 - Cloud-Native Solutions (AWS)
 - Backend & REST API Development
 - Software Development Lifecycle
- System Design & Scalability
 - CI/CD Pipeline Implementation
 - Containerization & Orchestration
 - Distributed & Scalable System Architecture
 - Technical Leadership & Team Mentoring
- Performance Optimization
 - Database Design & ORM Frameworks
 - Cross-Functional Collaboration
 - Project Management
 - Requirement Gathering & Analysis

TECHNICAL SKILLS

Programming Languages	Java
Frameworks & Libraries	Spring, Spring Boot, Hibernate, Spring Data JPA, Angular, React, Node.js
Microservices & Messaging	Microservices, Kafka
Cloud & DevOps	AWS, Docker, CI/CD, GIT
System Design & Architecture	System Design, HLD, LLD, Monolithic to Microservices Migration
Databases / Persistence	(Implied: JPA/Hibernate – no additional DBs mentioned)
Specialized Domains / Tools	OCPP 2.0.1 Compliance, OpenMRS

SOFT SKILLS

Negotiation & Conflict Management	Team Building & Interpersonal Skills	Analytical Problem Solving
Visionary and Decision Making	High Business Ethics	Leadership and Delegation

DOMAIN EXPOSURE

- Banking
 - Healthcare
- Electric Vehicles (EV)
 - Internet of Things (IoT)

EDUCATION

-  Bachelor of Technology in Computer Science Engineering
- Uttar Pradesh Technical University (UPTU), Uttar Pradesh, India – 2016

CAREER TIMELINE

WORK EXPERIENCE

Apr 2023 – Present | Lead Software Engineer | TechStar Group

- Leading and contributing to full-stack Java development projects, delivering end-to-end software solutions.
- Designing and developing cloud-native microservices with Spring Boot and AWS for scalable, high-performance applications.
- Collaborating with Business Analysts and Product teams, translating requirements into technical designs and actionable solutions.
- Performing system design activities, including High-Level Design (HLD) and Low-Level Design (LLD), to create modular and reusable components.
- Developing backend services, REST APIs, and managing the full SDLC lifecycle across multiple domains including Banking, Healthcare, EVs, and IoT.
- Managing containerized deployments and optimizing CI/CD workflows while mentoring and guiding teams of up to 14 engineers.

Aug 2022 – Apr 2023 | Lead Software Engineer | Nickelfox Technologies

- Fostered a collaborative and innovative environment, promoting a culture of excellence.
- Led development of cutting-edge software solutions, ensuring high-quality delivery to clients.
- Mentored team members and drove best practices in software design, development, and deployment.

Jun 2016 – Aug 2022 | Java Developer | Samin Tekmindz

- Worked as a Java Backend Developer using Spring, Spring Boot, Hibernate, Spring Data JPA, and OpenMRS.
- Built and maintained backend services, APIs, and data persistence layers to support healthcare-focused applications.
- Collaborated with cross-functional teams to deliver reliable, scalable backend solutions.

KEY PROJECTS

CBRE – TOPS2 Platform | Software Engineer | 30 months

- Worked across multiple D&T (Digital & Technology) products within the TOPS2 ecosystem.
- Contributed to feature development, performance optimization, and modernization of existing modules.

Silk + Sonder – Lifestyle & Skill Management App | Software Developer | 8 months

- Contributed to the development of a lifestyle and skill-management application with a live journaling feature.
- Implemented user-centric enhancements to improve usability and engagement.

Open Charge Alliance – Compliance Testing Tool | Backend/Integration Engineer | 10 months

- Developed and maintained a compliance testing tool validating System Under Test (SUT) behavior against **OCPP 2.0.1** specifications.
- Improved reliability and automation of validation workflows.

Mobile Banking Platform (African Bank) | Backend Engineer | 7 months

- Developed secure and scalable backend services to support mobile banking operations.
- Enhanced API performance and contributed to feature development for financial transaction workflows.

Blink EV Mobility Platform | Software Engineer | 7 months

- Redesigned a legacy monolithic system into a scalable microservices architecture, improving performance and maintainability by 30%, and created precise HLDs/LLDs for modular component design.
- Optimized CI/CD pipelines to cut deployment time by 40%, increase release frequency, and developed robust APIs/microservices that enhanced integration and reduced response times by 25%.
- Partnered with Business Analysts and Product teams to convert business requirements into clear, actionable technical user stories, streamlining development and delivery.

PERSONAL DETAILS

Languages Known: English, Hindi

Address: N2-508, Jaypee Aman, Sector 151, Noida, Uttar Pradesh. 201310
